c/w Top & Bottom Lites

**DOUBLE GLASS PERSONNEL DOORS**  
With Door Hoods

Crafted for durability, these doors complement the structures while providing access and security

## Doors

A wide range of personnel doors are available for Sprung structures including single, double, glass and oversized—all with optional panic hardware. Specifically designed door hoods provide an added level of safety by effectively diverting water and snow from the door entrances.

**SUNTOP WINDOW**  
With Window Hood

Crafted for Attention to detail makes these windows look as great on the inside as they do on the outside.

## Windows

Windows let your staff and visitors enjoy more natural light, and provide a view of the world around them. Windows improve aesthetics both inside and out, with an architectural flair.

Our distinctive windows, including thermal-pane and energy-efficient argon-filled tempered safety glass, are available in a variety of styles: rectangular, elliptical, gothic, and suntop.

Exterior Mounting

**ROLLING SERVICE DOORS**  
Interior Mounting

Durable and reliable, these doors are designed for large openings.

## Cargo Doors

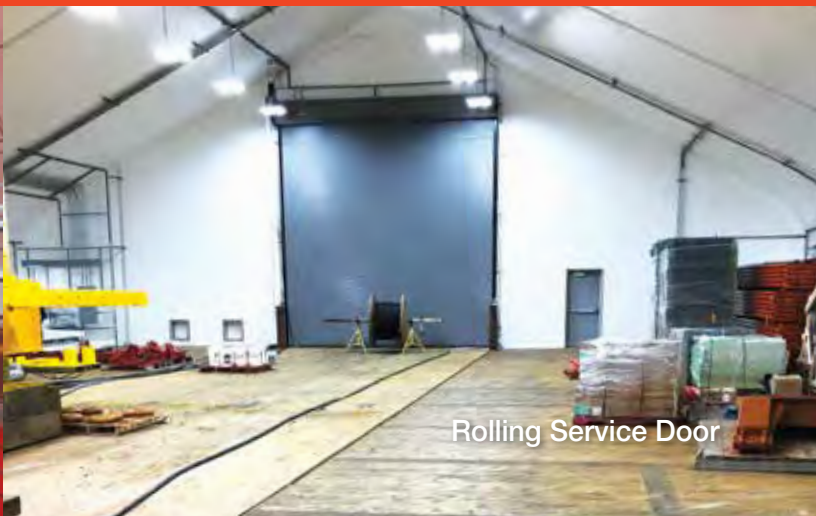

Rolling Service Doors can be mounted internally or externally for a reliable cargo door solution. Protective door hoods divert snow and rain for installations on center modules.

Center Pivot Rotation Doors come in Double, Triple or Quadruple panel sizes. These doors utilize pneumatic wheels that allow the door to slide inside the structure.

# Canopies, Corridors, Hoods and Vestibules

Protective door hoods and vestibules divert snow and rain from entrances. Attractive canopies enhance entry points and can be outfitted with additional lights and branding. Using connecting corridors to connect a Sprung structure to existing buildings or other Sprung structures is simple and cost effective.

**DAYLIGHT PANELS**  
In peak creates optimum  
working environment

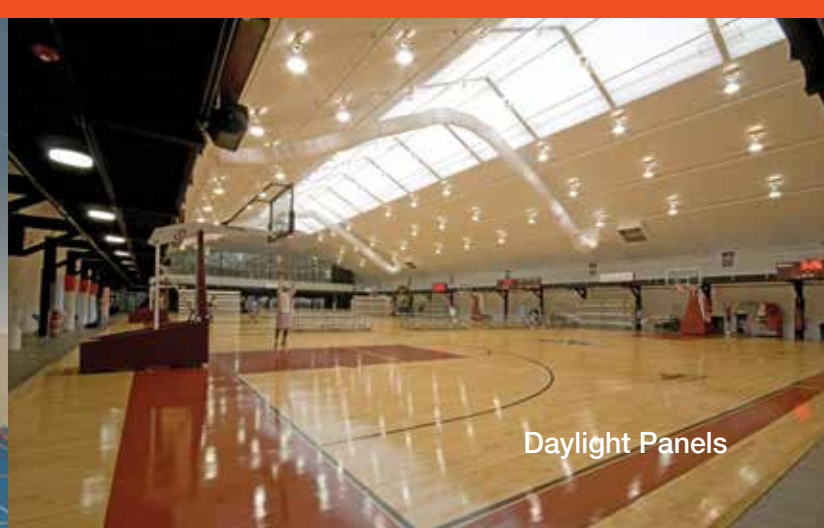

## Translucent Daylight Panels

Our translucent daylight panels are built into the structure's membrane envelope. The result is a large area that diffuses light throughout the building. Diffused light provides a more even, uniform lighting profile without glare. Increased exposure to natural light improves productivity and lowers energy costs.

## GLAZING WALLS

Bring in natural light and enjoy the views outside.

# Glazing Walls

Glazing wall frames are engineered to integrate perfectly within the Sprung arched profile and provide stunning views with natural light. Glazing walls resist air and water infiltration.

Glazing Walls

## Sprung Shield

Optional Sprung Shield is a lightweight rolled aluminum panel installed around the perimeter of the structure to the height of 8' (2.43m) and is available in a variety of colors and textures. The Sprung Shield hard wall system provides added protection against vandalism.
