### Warehouse

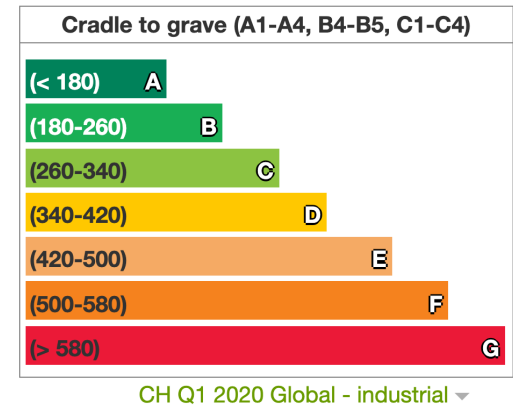

Retained sample size : 82 projects. Data predominantly from Western Europe (56 projects). Data is included into the benchmarks based on mechanical and manual screening that considers consistency, completeness and plausibility. Projects that display aberrant values or inconsistency have been excluded from sample.

### Others

Retained sample size : 26 projects. Data predominantly from Western Europe (14 projects). Data is included into the benchmarks based on mechanical and manual screening that considers consistency, completeness and plausibility. Projects that display aberrant values or inconsistency have been excluded from sample.

### Industrial

Retained sample size : 25 projects. Data predominantly from Western Europe (19 projects). Data is included into the benchmarks based on mechanical and manual screening that considers consistency, completeness and plausibility. Projects that display aberrant values or inconsistency have been excluded from sample.
