About the Project

THE ASK

The frequent rain on the north shore of Oahu brings incredible beauty, but it also dampened the physical activity for students at Hanalani School. Their outdoor basketball court was unusable for a large part of the day – many days a year – due to moisture. They needed something to keep out the rain, but maintain the freshness of their open-air sport court.

They carefully reviewed multiple solutions and chose Sprung Structures to solve their problem.

HOW SPRUNG DELIVERED

Within weeks, Sprung designed and delivered an open-air cover for the outdoor gymnasium. A local installer installed it without difficulty and the students were back on the court – any time, any day. Affectionately dubbed “The Sprung,” the structure’s daylight panels invite constant diffused light, and can be supplemented with internal lighting. Now more than just a sport court, it provided much-needed extra space during the COVID-19 pandemic, and the school hosts various new activities in the sprung.

The Sprung at Hanalani has been a tremendous blessing for our school. The versatility to play both volleyball and basketball, as well as act as a multi-use facility for PE activities for school has expanded our school’s creativity.”

– Jeremy Honold
Athletic Director

About Hanalani School

Nestled on six beautiful acres in Mililani, Hanalani Schools has nurtured, challenged, and prepared preschool through Grade 12 students for success in both college and life for over 70 years. Hanalani seeks to enrich the whole child – mentally, physically, and spiritually – and develop successful leaders by offering high-quality programs powered by STEAM (Science, Technology, Engineering, Arts, Math) and built on three foundational pillars: core knowledge, critical skills, and Christian character. www.hanalani.org

THE SPECS

60' wide x 105' long | Open sunshade | Natural light

During COVID, our staff could meet together safely. Protection from the elements, while still promoting healthy airflow, has opened new opportunities and creativity for our school.”

– Jeremy Honold
Athletic Director

We Know Education

At a time that requires the re-imagining of the educational landscape around the world, Sprung Structures creates flexible, cost-effective spaces that promote health and safety, equality and participation. Every day, students around the world excel in Sprung structures with uses from dining halls and gymnasiums to classrooms and ice rinks. While educators can stay focused on students' needs, we provide:

- Rapid construction
- Design flexibility
- Performance & durability
- Lower overall costs

With Sprung, your new venue can be up and running much faster than other systems, and trades can be inside working as the structure is being completed. With the design and speed you need, Sprung delivers the right cost-effective solution.

The Sprung Difference

► SPRUNG CARES

Our teams work in some of the most vulnerable environments and harshest conditions. At Sprung, we are deeply committed to positively impacting the communities we serve and applying our innovative ideas to help solve complex problems.

► UNMATCHED REPUTATION

Invest in the most reliable, versatile and technically advanced structures globally: Sprung has erected 13,000 structures in more than 100 countries.

► ENGINEERED FOR EXTREME CLIMATES

Sprung structures are engineered to withstand extreme weather conditions.

► IMMEDIATE DELIVERY FROM INVENTORY

Complete projects in a much shorter time frame than conventional construction.

► CUSTOMIZABLE

Customizations include performance insulation packages for superior indoor climate control, peak integrated daylight panels, doors and entryways for every application, and countless accessories.

► LIMITED FOUNDATION REQUIREMENTS

Save on foundation costs where appropriate soil conditions exist. Concrete foundations are not required for Sprung structures up to 160 ft. in width, saving time and cost for installation.

► COST-EFFECTIVE, COMPACT SHIPPING

Enjoy the convenience and cost savings of shipping up to 15,000 sq. ft. in a single, standard ISO container.

About Sprung

Sprung meets rapid-response building needs in a wide range of leading businesses and organizations including the global armed forces, the natural resources industry, manufacturing, commercial gaming, education, disaster recovery, healthcare, aviation as well as sports and recreation. Sprung has designed and patented tensioned membrane technology that outperforms other building alternatives and offers a faster, better build. Year after year, we continue to engineer the most innovative, versatile and reliable building solutions.

Sprung has designed and patented tensioned membrane technology that outperforms other building alternatives and offers a faster, better build.

You can trust us to design and manufacture your facility with speed and quality that far exceeds your expectations. Our experience proves it; our history demands it. In business since 1887, Sprung has completed over 13,000 structures in more than 100 countries.
